To Whom it may concern,

On behalf of Pasquale and Ashley Iovieno, Solar Generation is proposing a 18 kW ground mounted solar array located at 106 Bristol Hill Road, Glenford. We are requesting an area variance, and will go through the site plan review process once the project moves forward. We are aware of the town code stating the 12 kW limit for solar, however, the proposed 18 kW array is what will be needed to reasonably offset the Iovieno's usage. Screening for the array is done naturally by the trees and green space between adjacent properties, and the array is located 222.4' from the road.

Sincerely,

Kelly DiMarzo

Solar Generation
